Modern handball:

Average attacks per game 120-140

Average time of the attack less than 30 seconds

Team spends more than 50% of the time in defense

Personal research of players during a match (in Asobal League) has shown that player in game spend :

**4 minutes and 30 seconds at most
with ball (less than 10% in game)**

**55 minutes and 30 seconds without ball
(more than 90% in game)**

Reaction speed :

During the same playing situation several players can be involved at the **same time**:

The playing situations happen at **high speed**

Stress (players, officials and spectators) may be a factor

Three types of reactions:

Seeing
0.15 sec

Hearing
0.12-0.27 sec

Feeling
0.09-0.27 sec

You need to take a decision in less than a second !

Study: Universidade Do Porto

- 18 elite Portuguese male referees
- 3 HD cameras
- 15 matches of the Men First National Championship

Total of all decisions during the game:

9 % incorrect decisions

14 % missed decisions

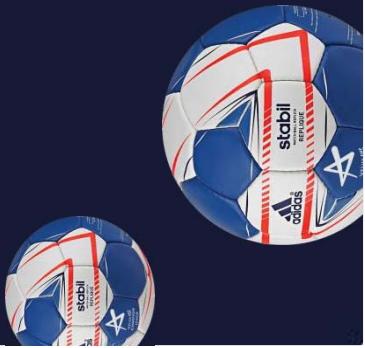

77 % correct decisions

On average, during the game we have a total:

171 decisions / including goals /

117 decisions / excluding goals /

decisions on every 21 - 30 sec

Some studies have shown:

So we have in match:

23 % of wrong decisions

1 mistake per 4 decisions made

Of those errors $\frac{1}{2}$ are serious mistake

Almost 5% of the decisions are connected with steps :

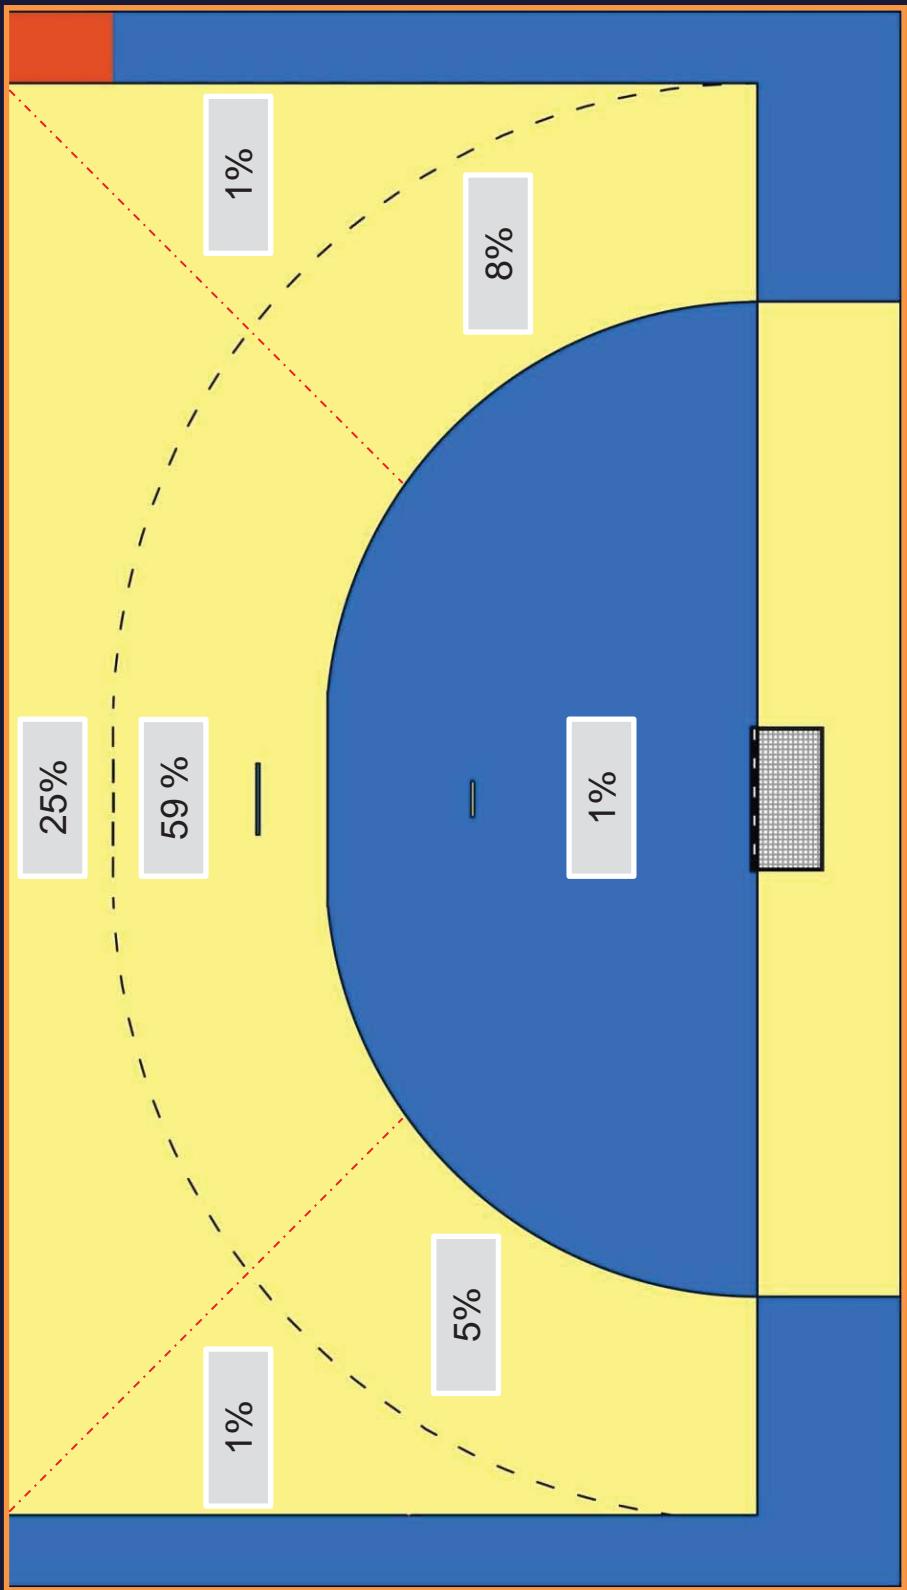

40 % correct decisions for steps

55 % unrecognized steps

5 % non existing steps

Statistics - decisions :

almost 85% of the decisions are in the middle of the court
