

Education Guidline book

My opinion and my experince is that ,it would be very useful if there would be a book of directions and education on the trainning of referees and delegates.
(for exaple : movement of the referees in the court during the game,
collaboration of the referees and delegates)

Rules development - more simple rules

As for the book of rules it would be better to be come simpler.
My view is that there are too many references.
That is why the rules should be completed without references.

Best regards
