

Dear Handball Friend,

Sorry for the delayed,I forgot it totally.

Vision in handball

I would like to share some generally ideas with you,some visions for the future.

Our handball becam faster and more atraktiv,but we can improve it,to make more spectacular.
How?

1.No throw-off, after the goals the goal keeper can play the ball imediatly to his playmate who has to get the ball on his half.,It could be higher tempo,faster game,more speed and new tactical elements.We can chanche all players at the same time,like in icehockey.

2.Sometimes I feel especially at the men matches/Bundeslga/ that to play with 6 players it is to much.The players are higher and stronger,they cover big areas and scarfaces,for the attackers no place enough.Reduce the number of players from 6 to 5.

The teams can play with two wings,left and right back,center or pivot player.they have to make lot of transition from the differently position and a lot of faking,wich are also spectacular for the spectators

3.The players could be used on all position.

4.To catch the ball generally with one hand and pass it :the game will be faster.

5.To use ont he matches just two reeferies-it is not enough.On the matches fall more goal with attacker faults/stepps,entering in the gol area,etc/.We need a third reefere,who control the regular goals.

6.If somebody remain ont he court because some injuries and the reefereis stopp the game and this player will be treat at the courtafter this treatment he6she has to leave the court and he6she can turn back again when the ball will be changed.

With best regards: Kovacs Peter
