

#### Indoor (for refereeing lectures) – Pick 4

From: Peter Hansson, Sweden and Peter Olsson, Sweden

#### Education Guideline book (for the EHF Member Federations to better educate EHF Referees and Delegates)

From our point of view is it necessary for the future to try to work forward material for the education, so it will be more same from the education point in the member countries. This will also be important on all levels, so the work walks in the closes as possible same direction. In guideline is also important to talk about what is expected from EHF Referee and Delegate.

#### Rules development – more simple rules

As we understand the idea of handball is important to try to make the rules as simple as possible, to try to make the refereeing, if possible easier. On the other side it should not be in the way that it takes the specular in our handball sport away. It can be very difficult task to balance this.

#### E-learning Referees and Delegates using EHF Web Portal content

When there is material to be used for the education is excellent with EHF Web Portal to be used for the learning process. But it must be structured so it can be used in good way, so it not takes too long time to find what you are looking for. It would be good, if also material for beginners of referees and delegates will be available.

#### Electronic Referee evaluation sheet – automatic procedure “Last to Next”

A more automatic procedure will be good in the work for the evaluation of referees. Possibilities to look former games to have an opinion about areas to look specially based on fact from earlier games. From our point of view is on the other side important that delegate not get access to everything – only in connecting to the work/game which he/she is involved in, otherwise we are worried that it will be used in total wrong way and it will give more problems than advantages.

Questions can be pointed out about how many different things should be in the report. We have a feeling in some cases referees do it because they must do it. Also has it happen that they want to do it together with the delegate, which from our understanding is wrong.
