What do you need to do in order to build a successful team?

To hold space for your team.

“Team = A number of people with complementary skills who are committed to a common purpose and set of performance goals”

Katzenbach and Smith, HBR March 1993

The partnership between all TEAM members.

- Play to people strengths (Don't focus on their weakness)
- Help people develop
- Lead by example
- Delegate (Don't try to do everything)

## Case Study!

Thank you!
