Stress evolutionary

Stress - power

Stress today

stress & lost of control

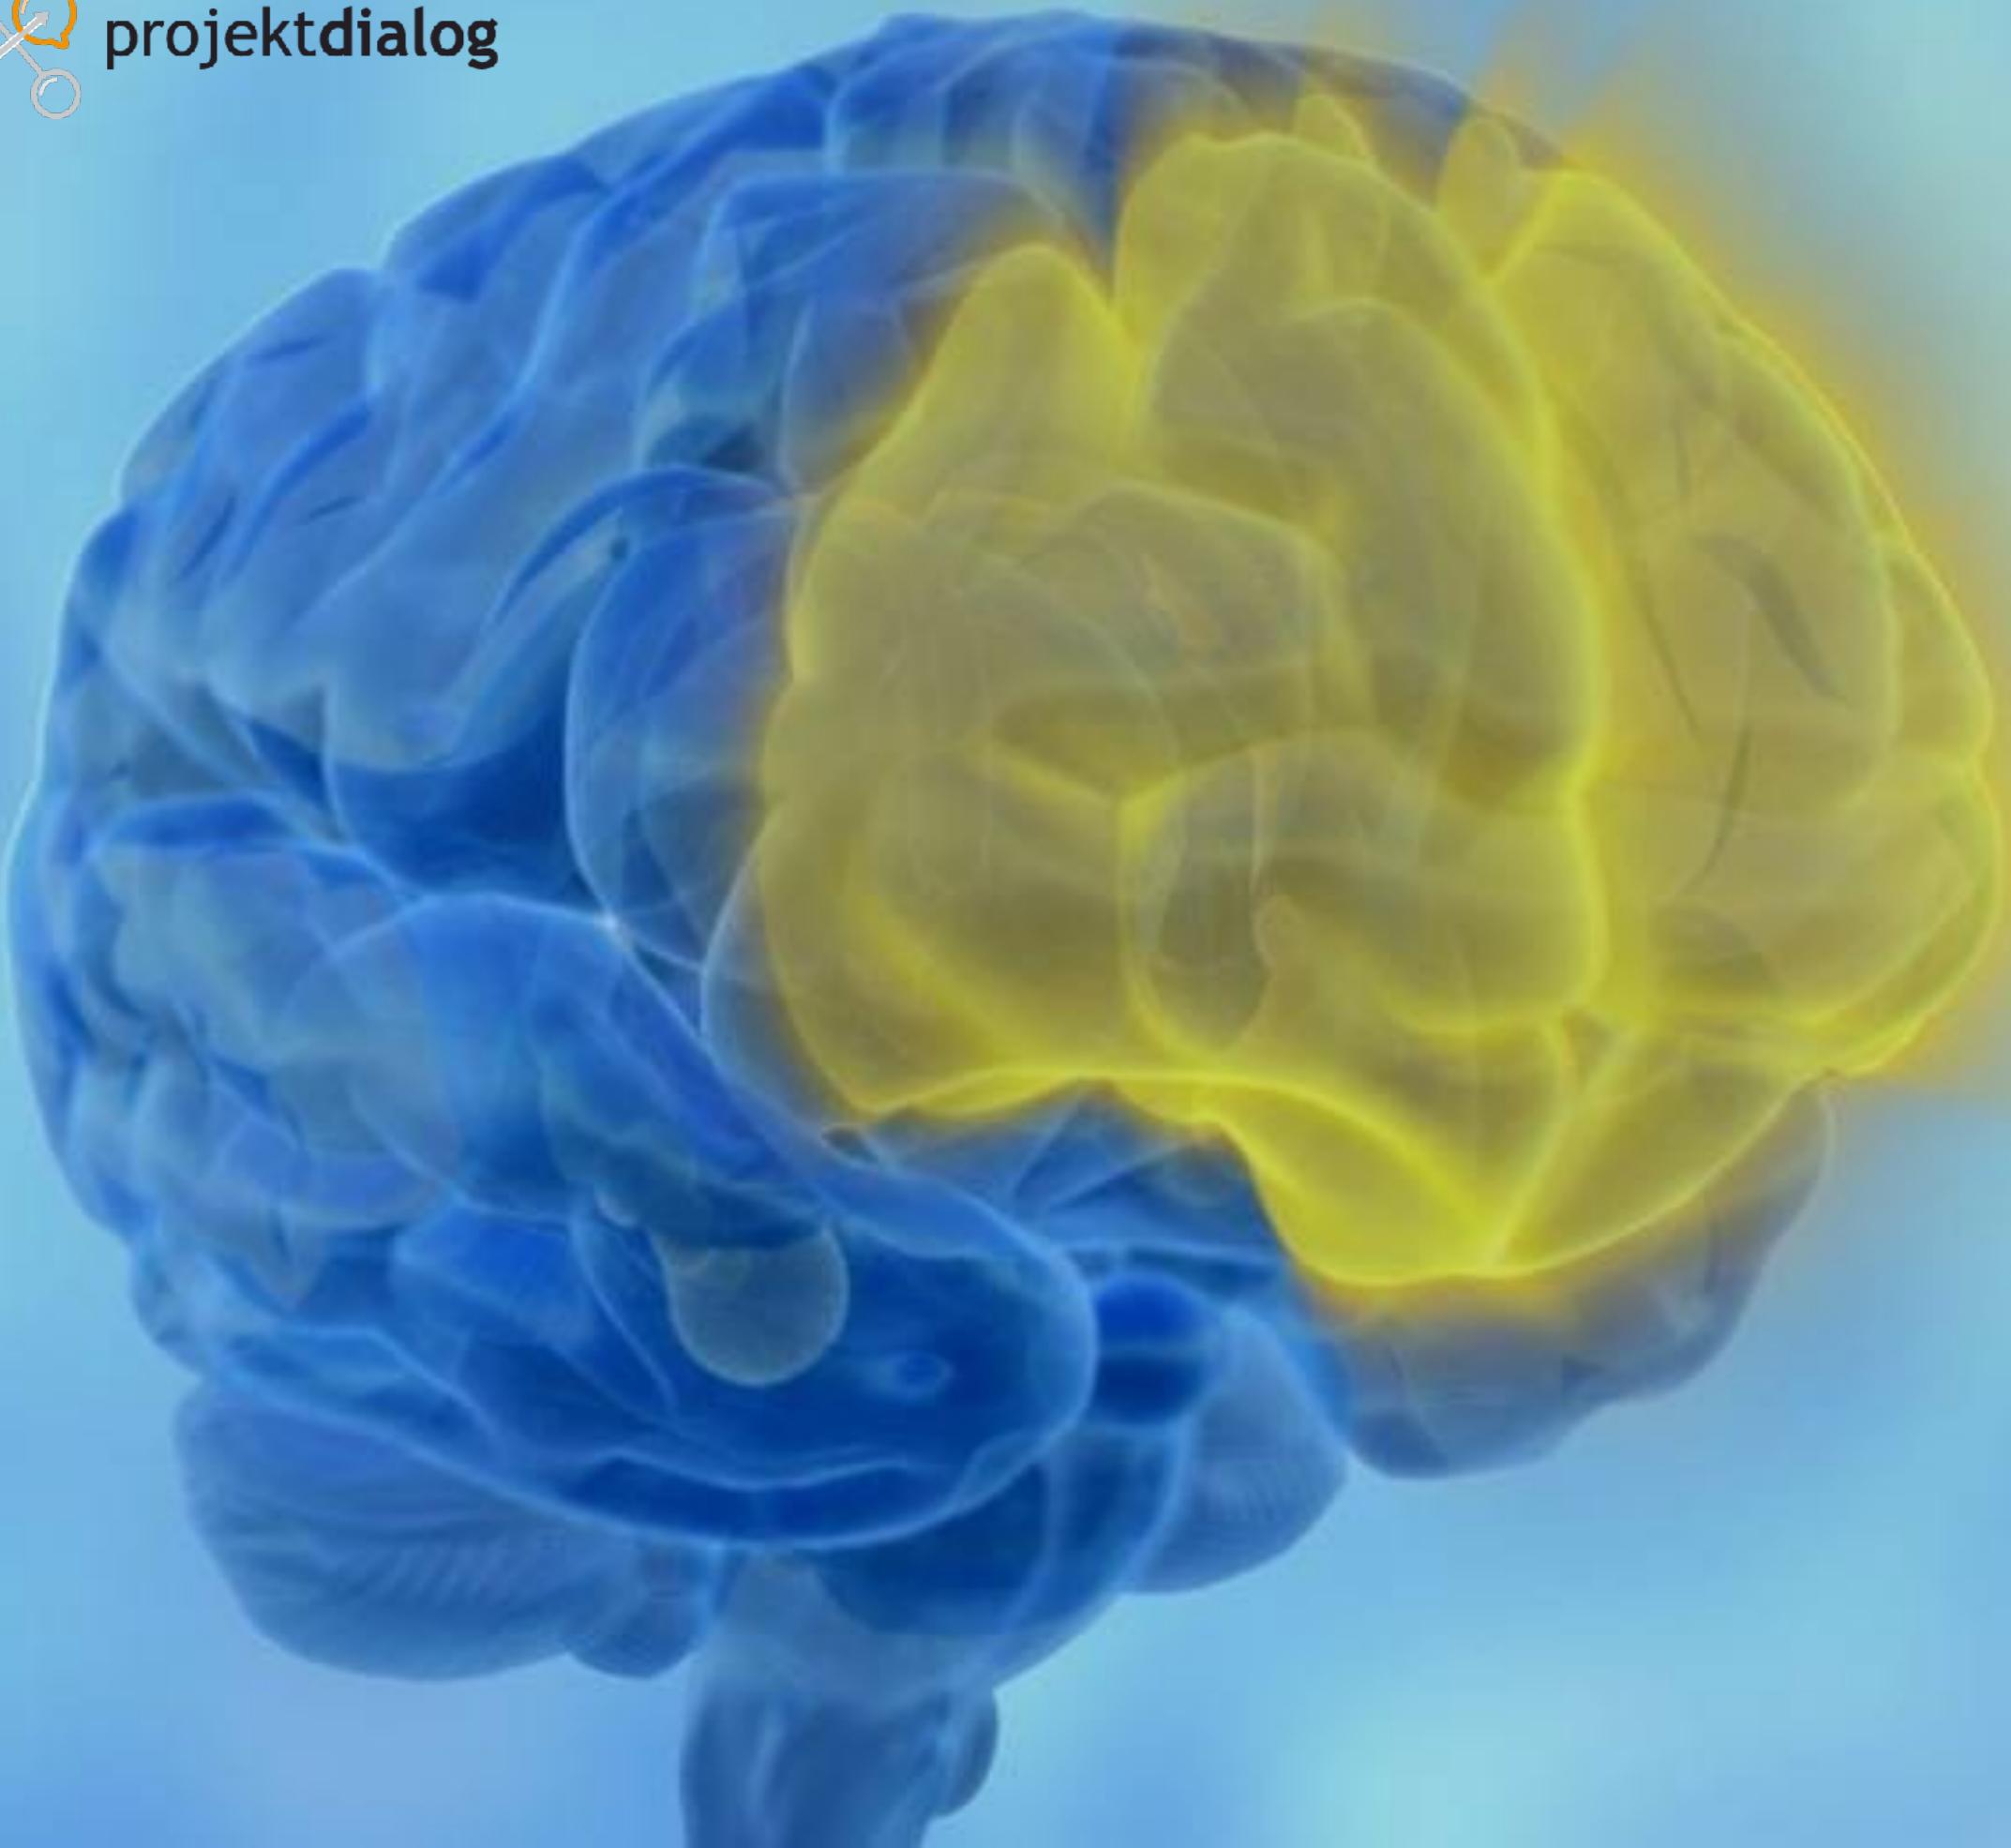

stress & lost of control

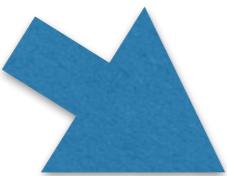

experiments

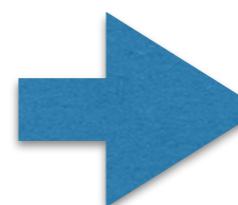

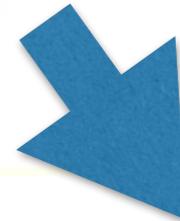

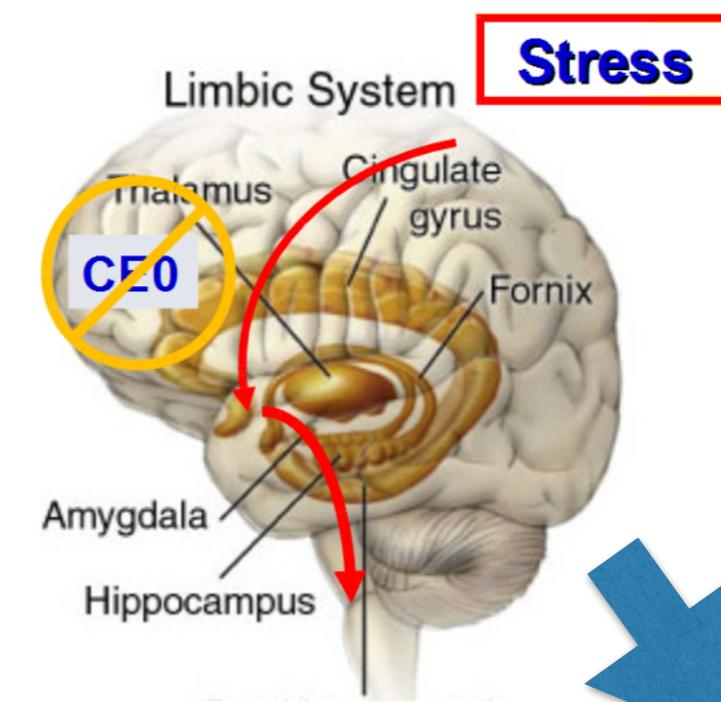

1. trigger

2. biochemical reaction (36 ms, adrenalins),

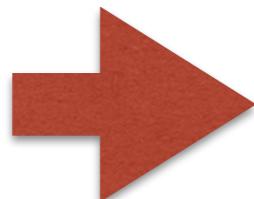

3. feeling (heart rate, pressure,breath)

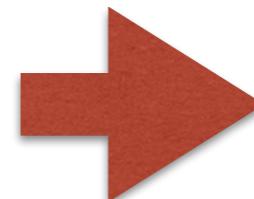

4. feeling (anxious)

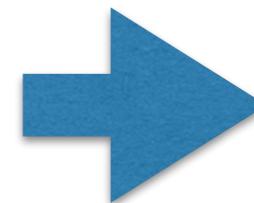

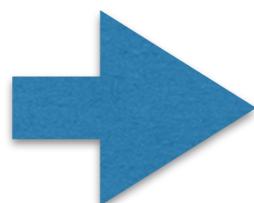

5. cognitive processing
(similar situations in past or in subconsciousness,pictures)

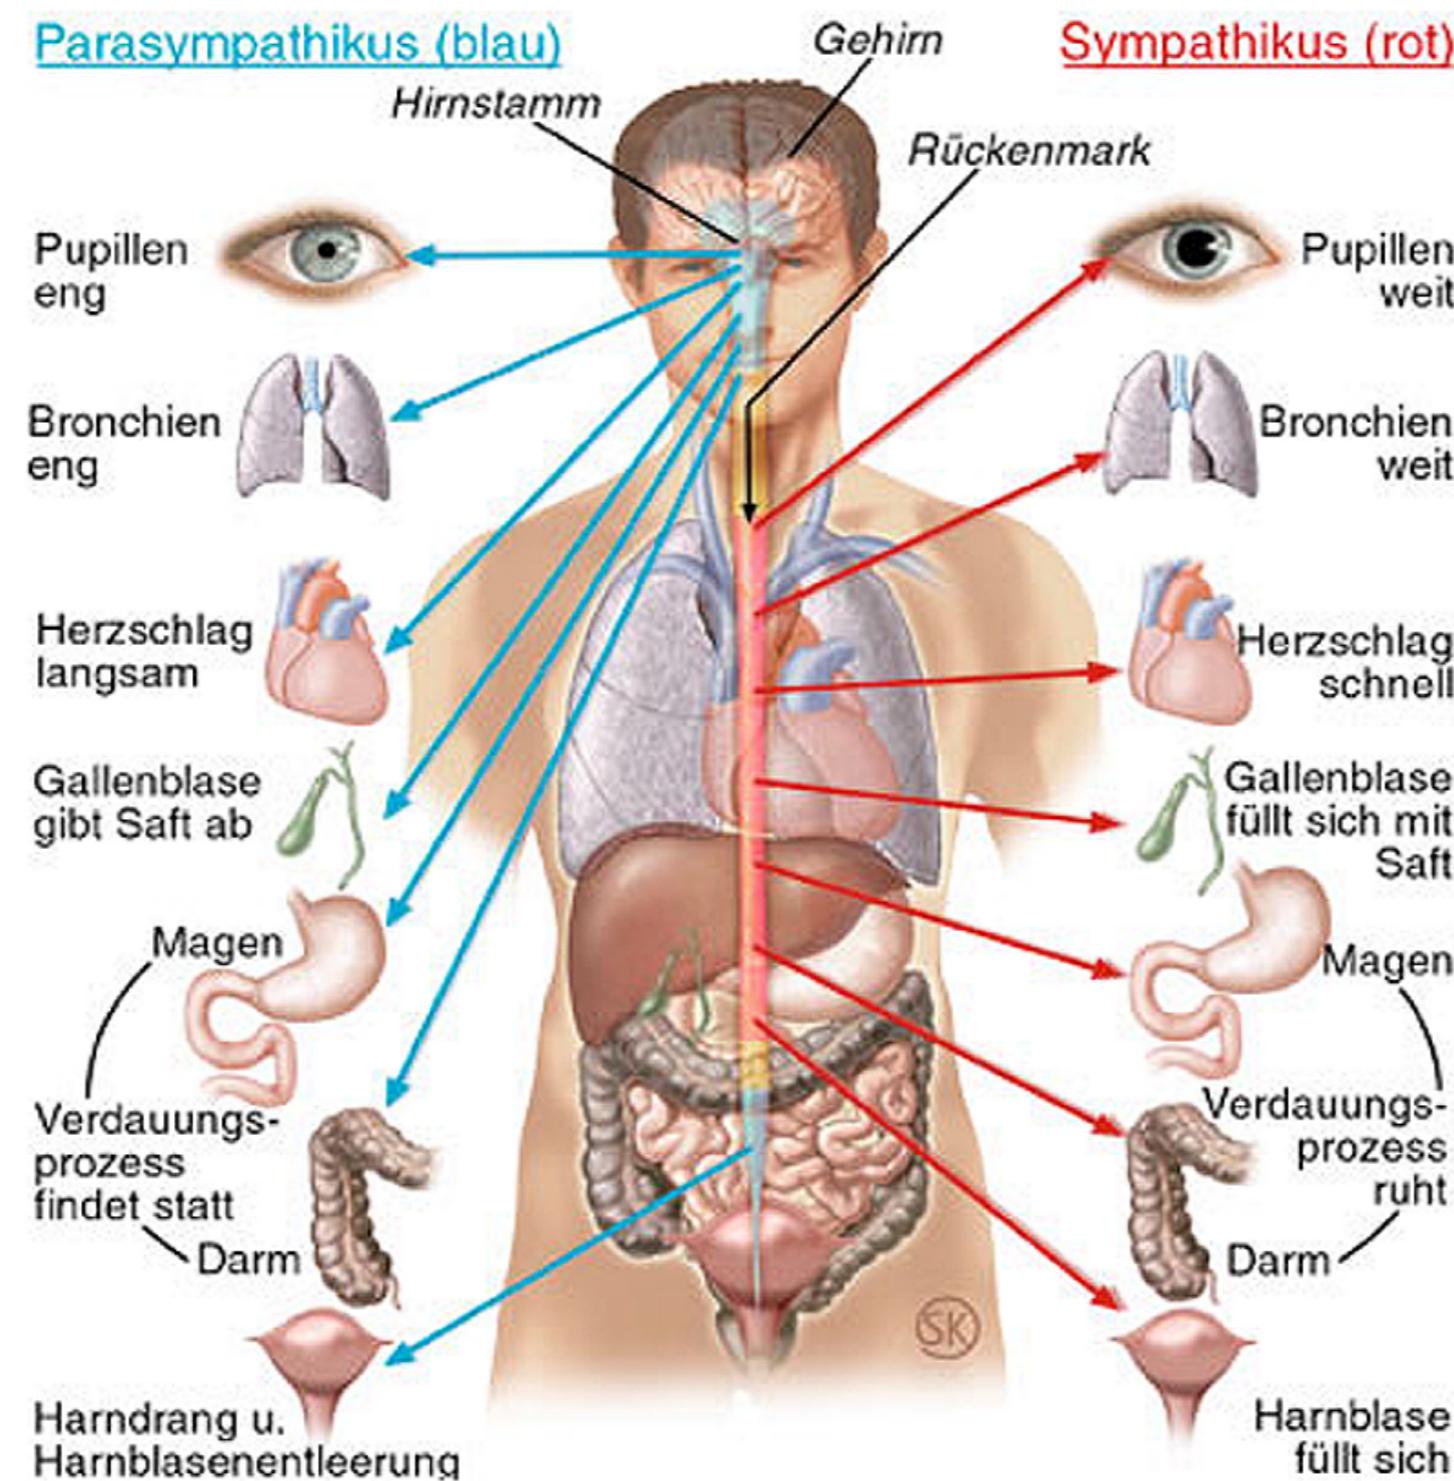

6. changing emotion
(caused by my pictures or thoughts)

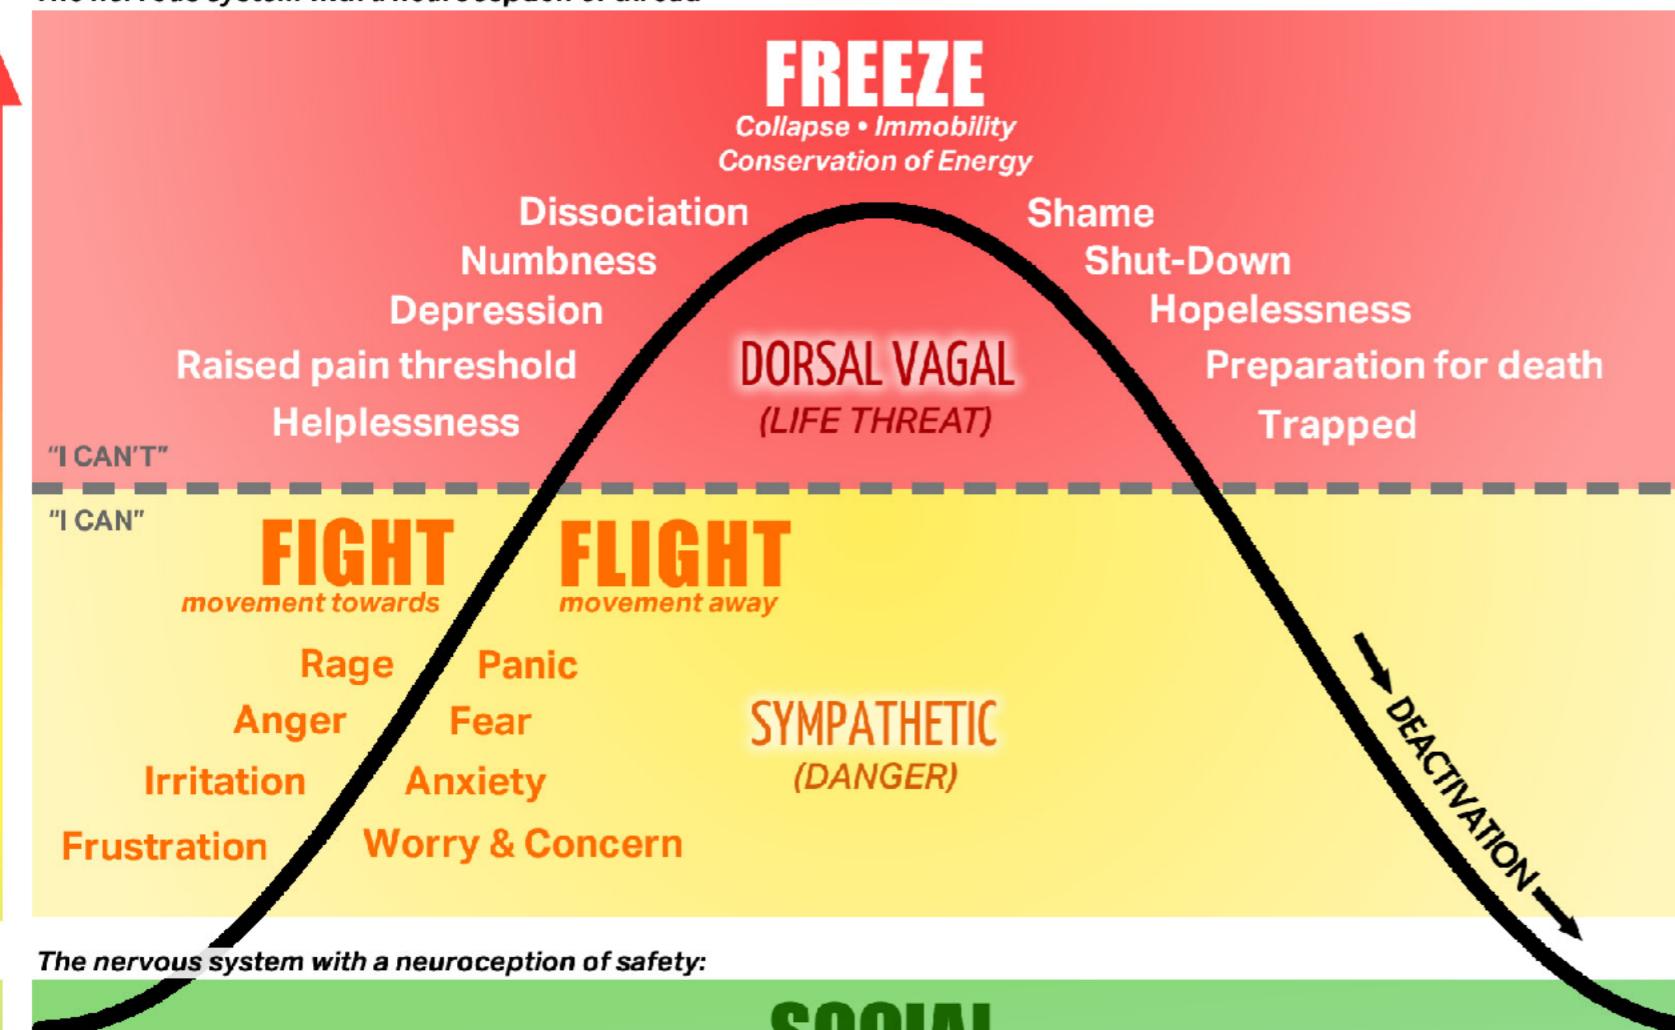

7. impact, behavior

the nervous system

The nervous system with a neuroception of threat:

The nervous system with a neuroception of safety:

PARASYMPATHETIC NERVOUS SYSTEM

DORSAL VAGAL COMPLEX

Increases

Fuel storage & insulin activity • Immobilization behavior (with fear)
Endorphins that help numb and raise the pain threshold
Conservation of metabolic resources

Decreases

Heart Rate • Blood Pressure • Temperature • Muscle Tone
Facial Expressions & Eye Contact • Depth of Breath • Social Behavior
Attunement to Human Voice • Sexual Responses • Immune Response

SYMPATHETIC NERVOUS SYSTEM

Increases

Blood Pressure • Heart Rate • Fuel Availability • Adrenaline
Oxygen Circulation to Vital Organs • Blood Clotting • Pupil Size
Dilation of Bronchi • Defensive Responses

Decreases

Fuel Storage • Insulin Activity • Digestion • Salivation
Relational Ability • Immune Response

PARASYMPATHETIC NERVOUS SYSTEM

VENTRAL VAGAL COMPLEX

Increases

Digestion • Intestinal Motility • Resistance to Infection
Immune Response • Rest and Recuperation • Health & Vitality
Circulation to non-vital organs (skin, extremities)
Oxytocin (neuromodulator involved in social bonds that allows immobility without fear) • Ability to Relate and Connect
Movement in eyes and head turning • Prosody in voice • Breath

Decreases

Defensive Responses

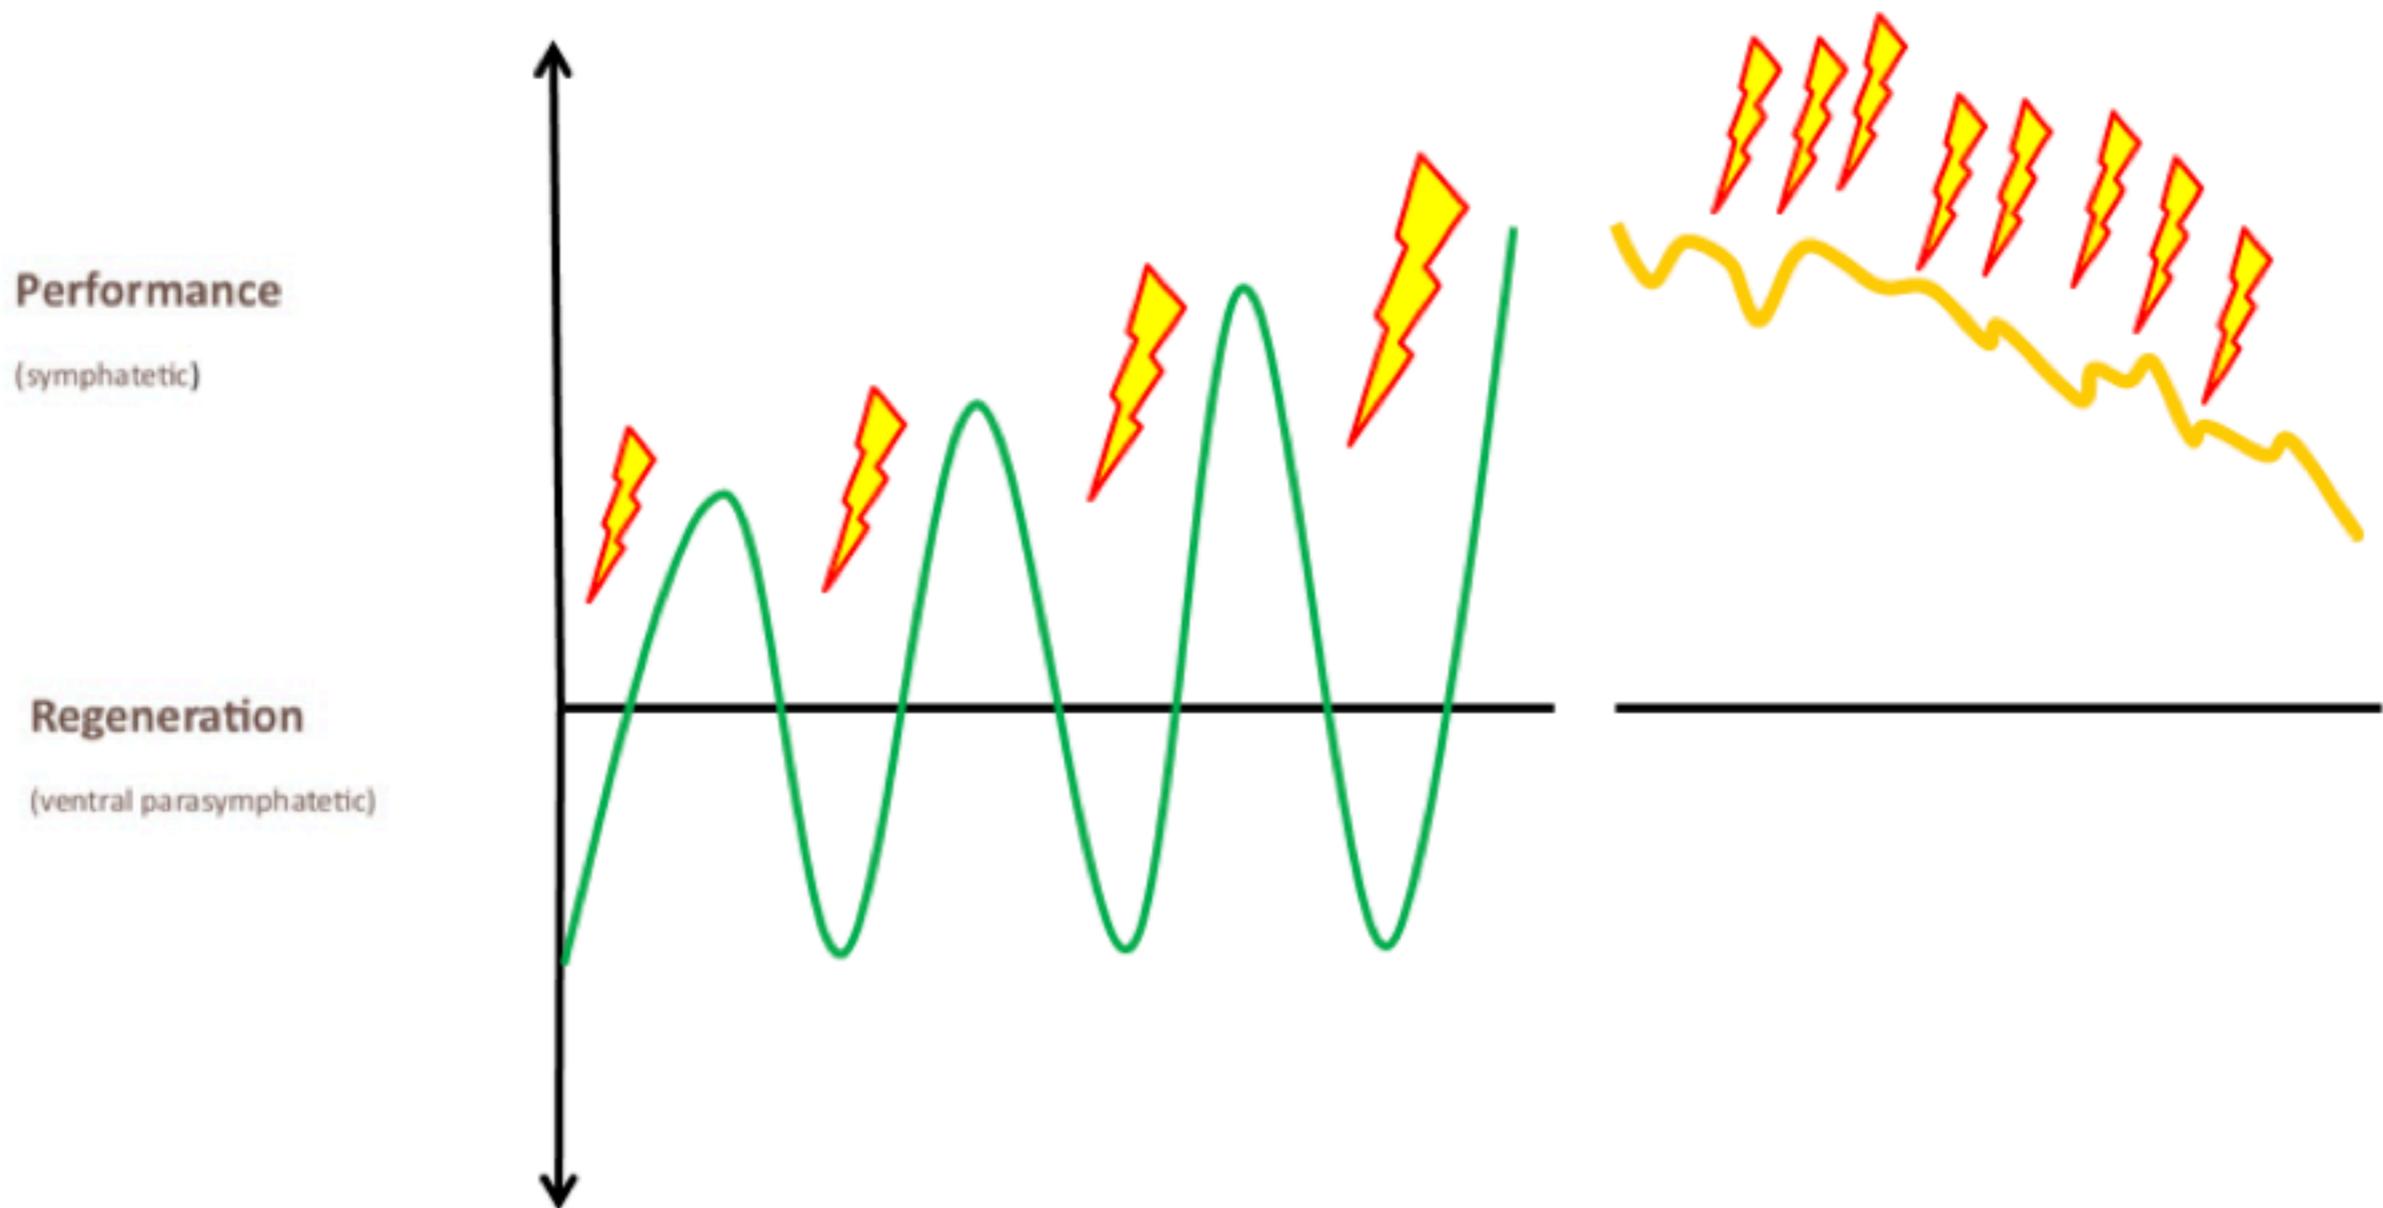

attitude & body language

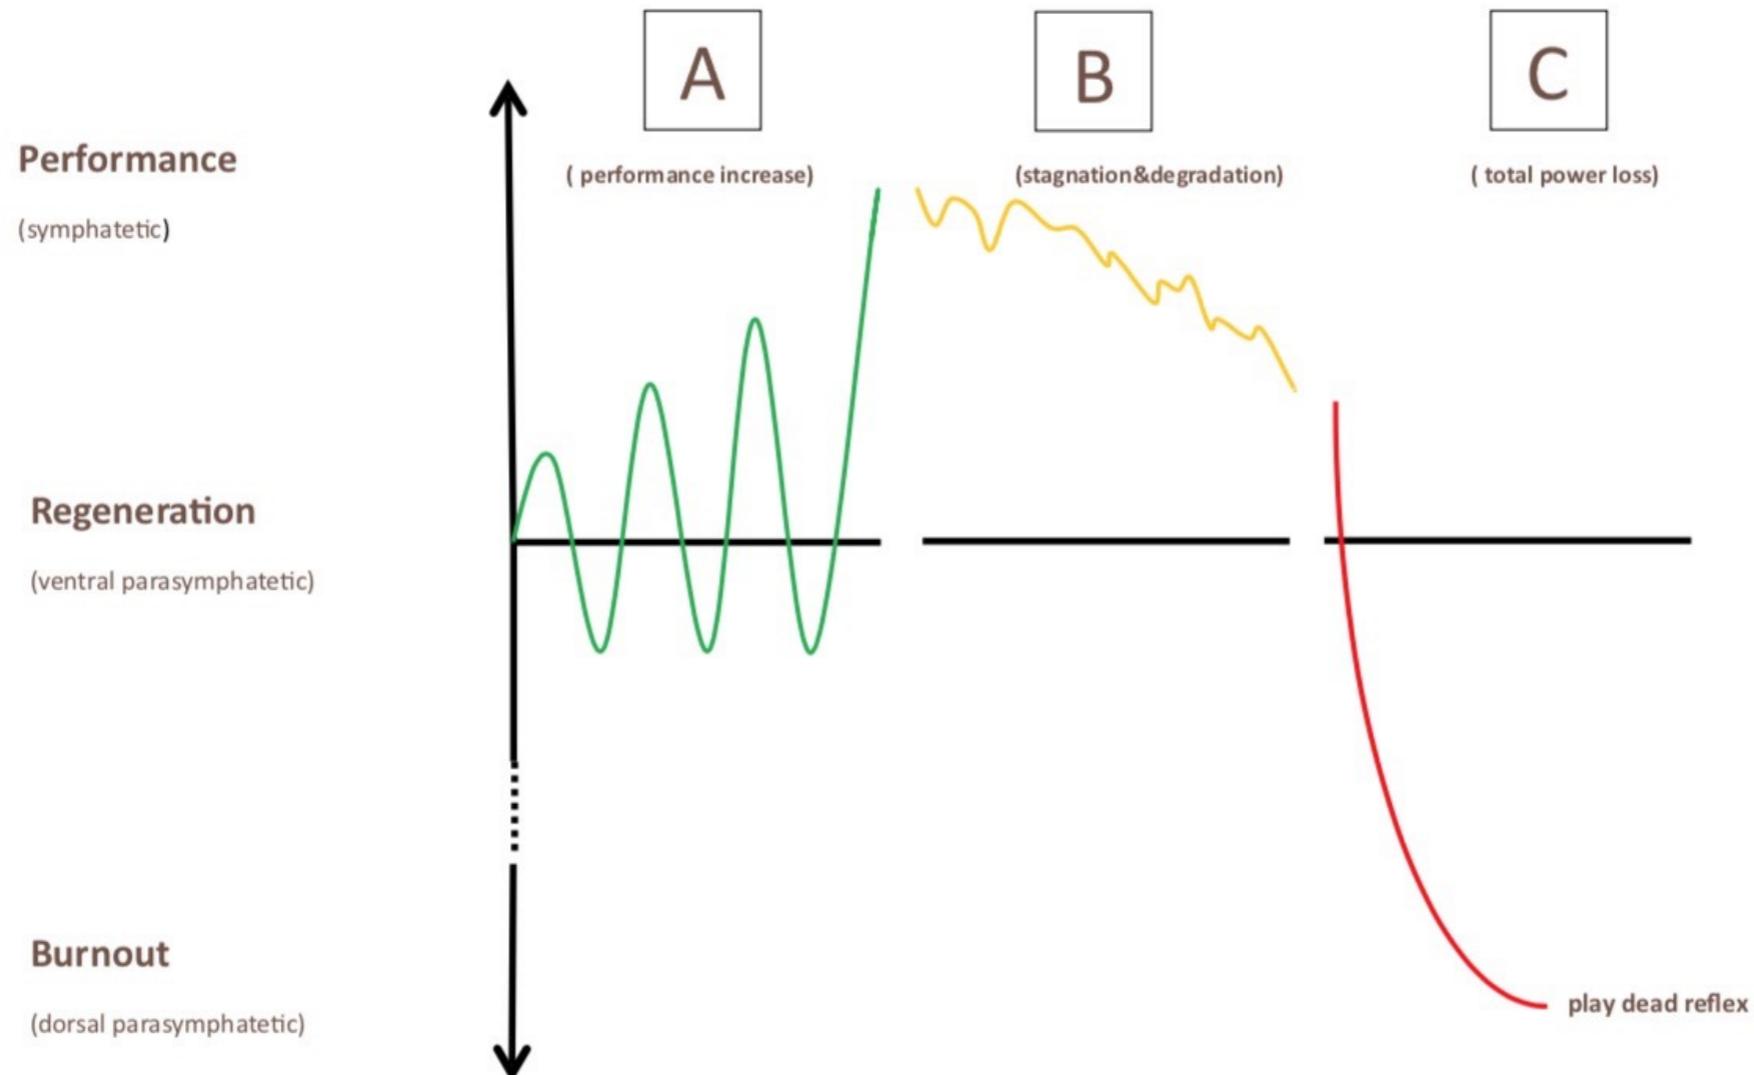

recovery - Regeneration

Dysregulation

the way back to performance

how to implement ?

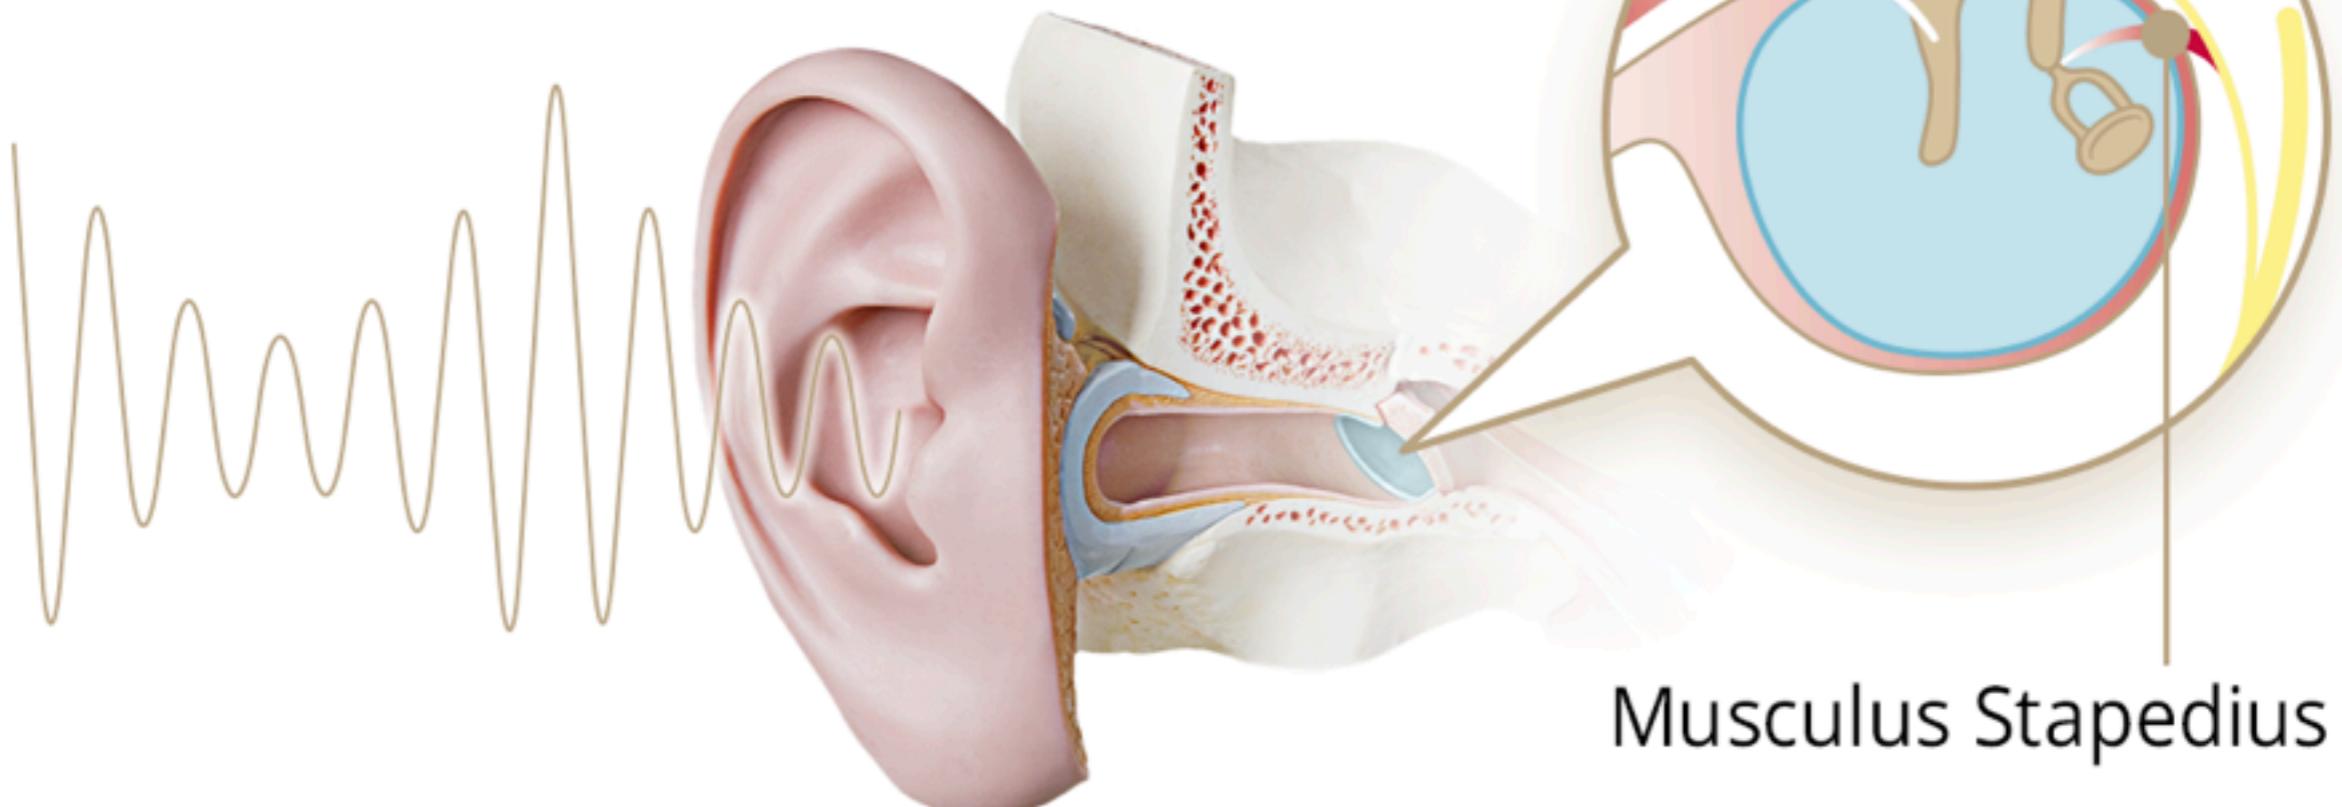

active stimulation of parasympathetic system

frequency-modulated sound waves

Musculus Stapedius

stimulating the parasympathetic nerve

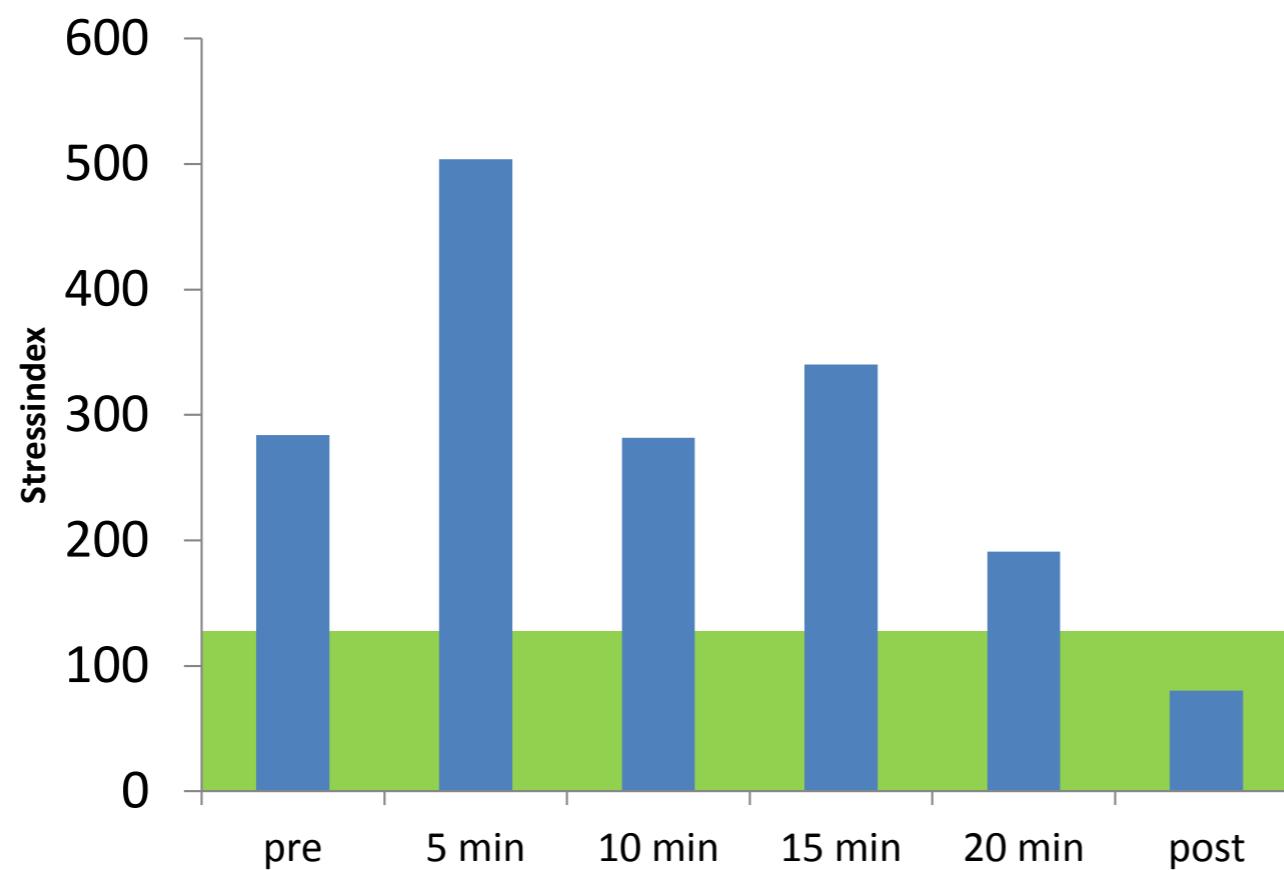

the factory

Stressfaktor Overload (DM-Teilnahme)

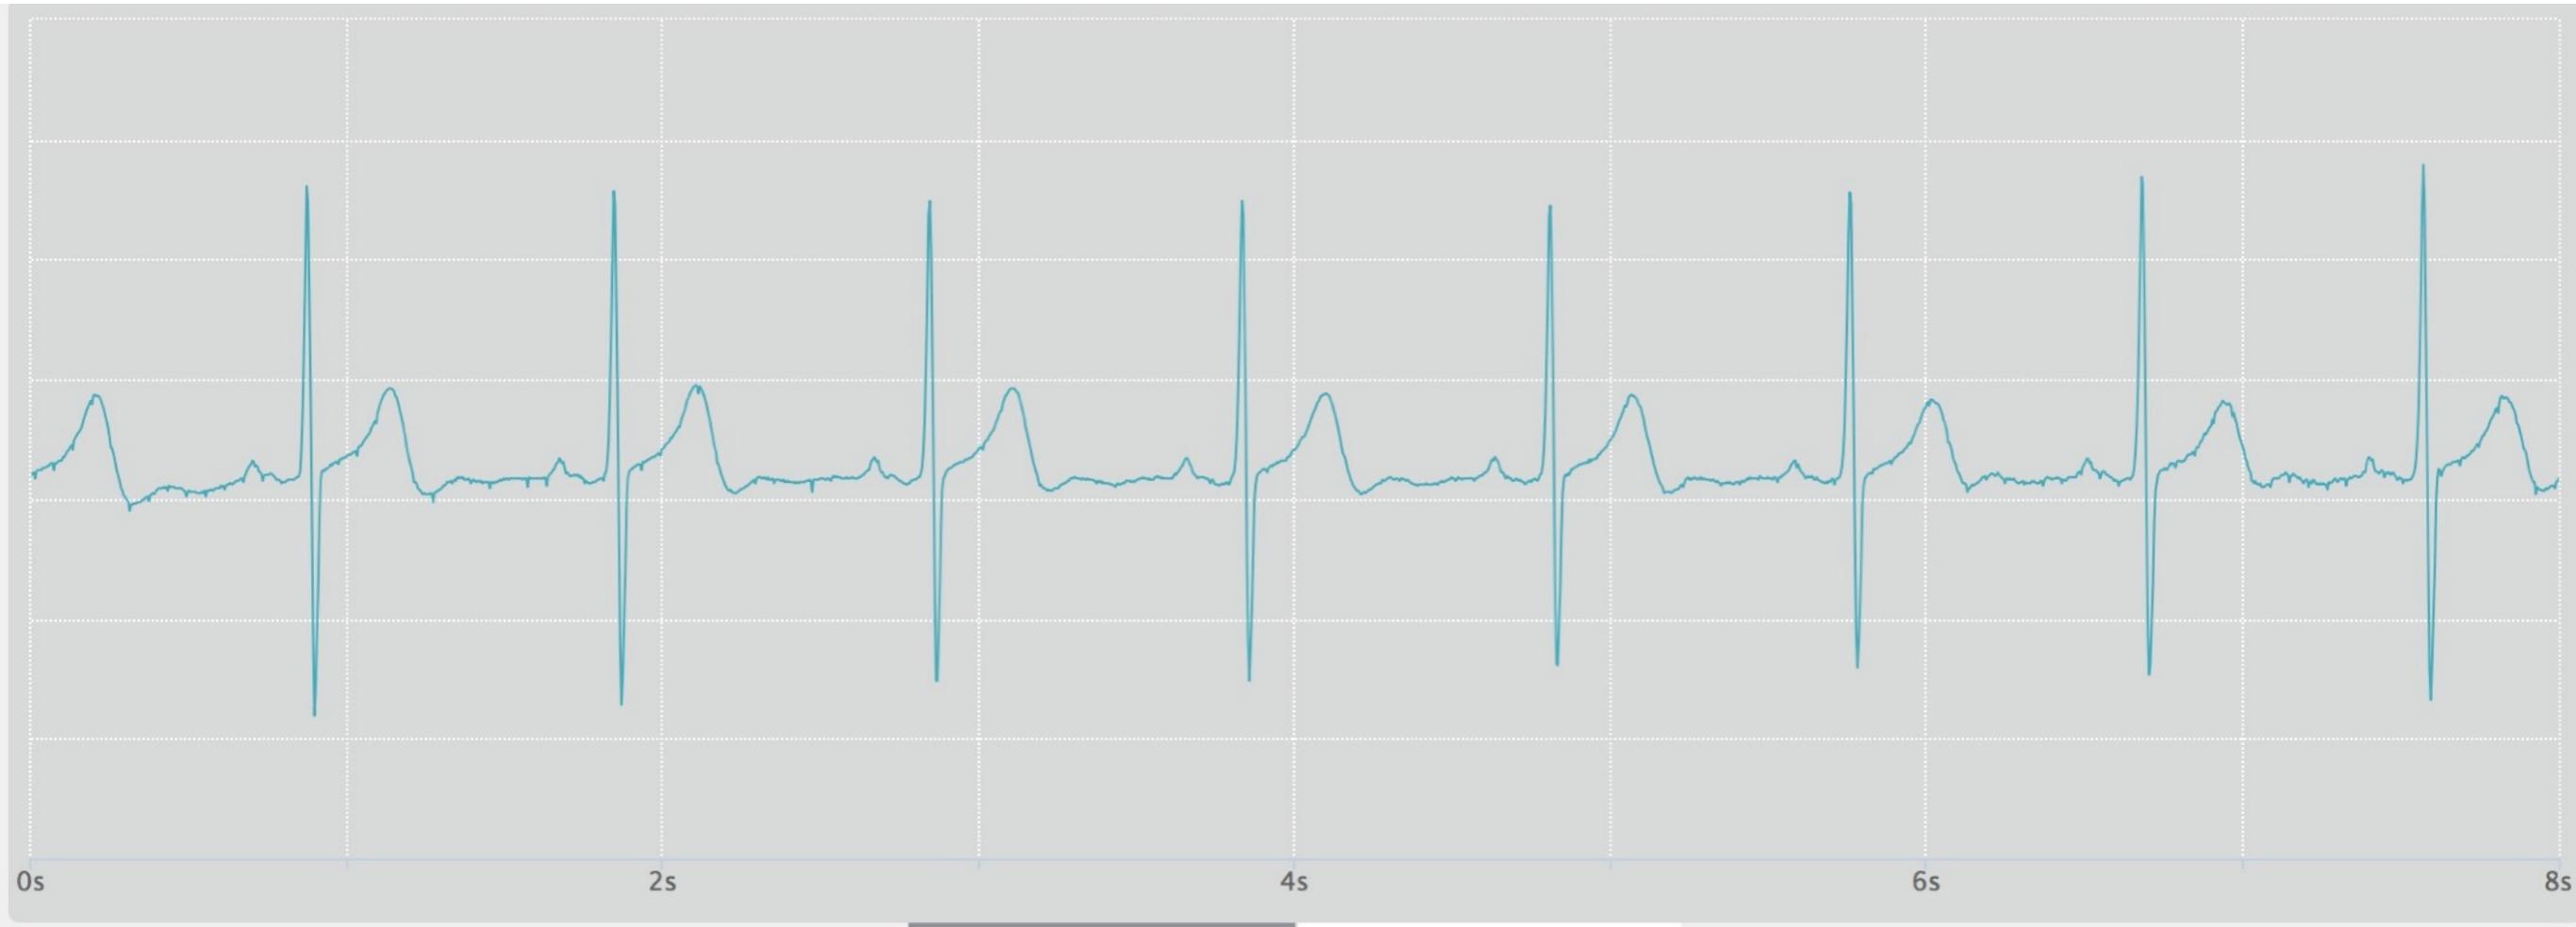

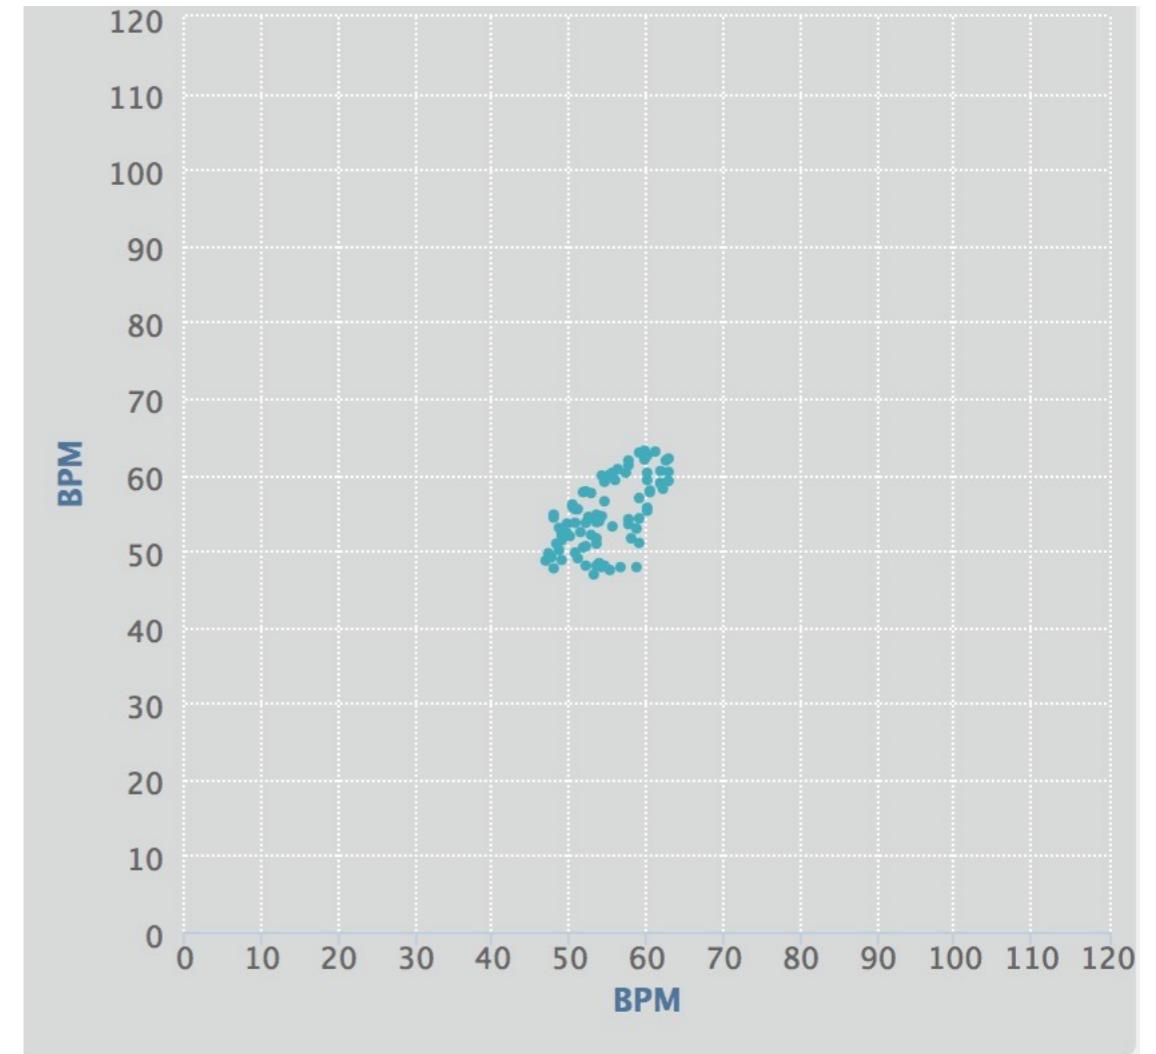

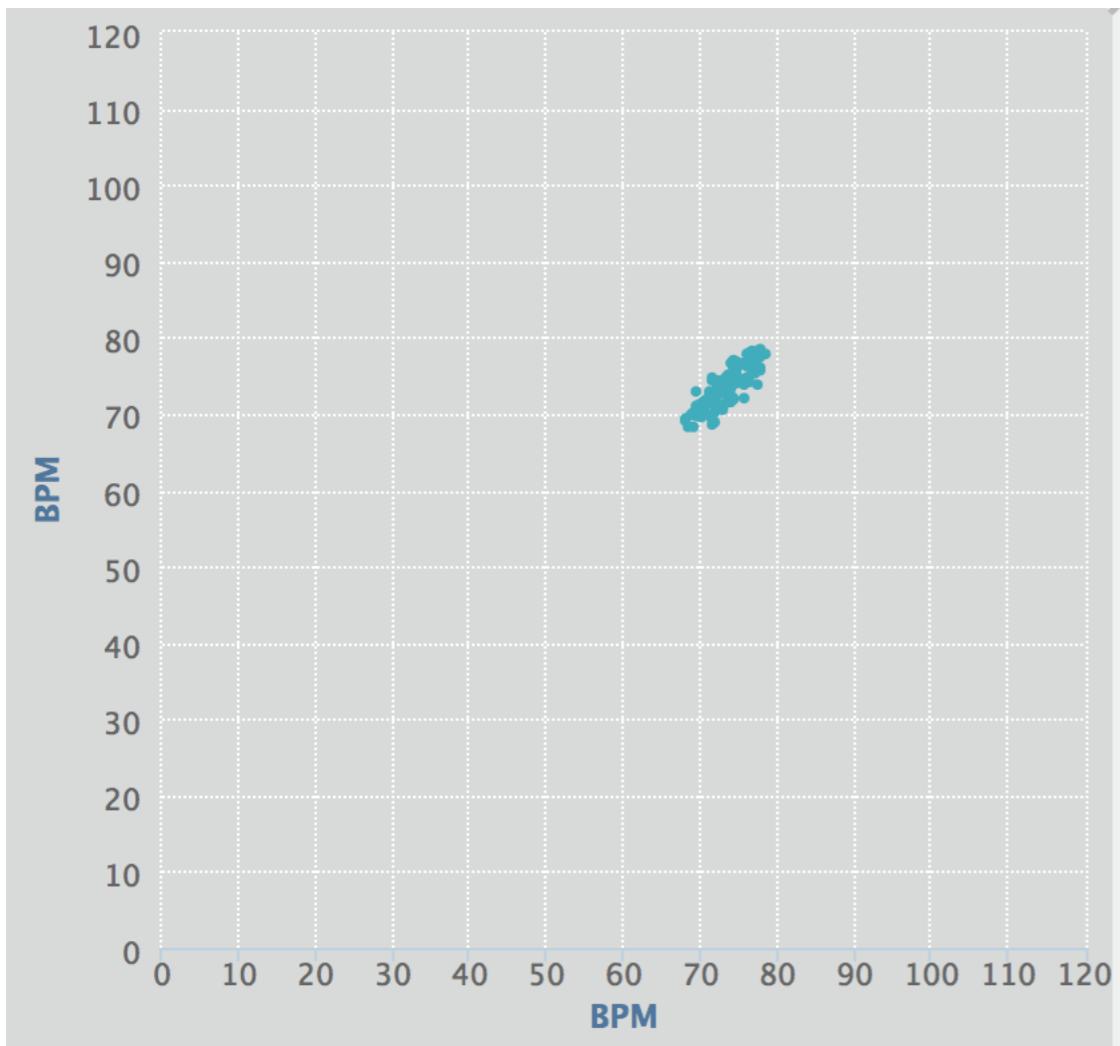

Many people think that our heart should beat as evenly as possible.
But the distance between each heartbeat is never completely the same.
Already 1700 years ago the Chinese knew about the importance of a variable heartbeat.
A variable heart rate indicates a positive state of health, whereas a rigid pulse indicates a very critical situation.

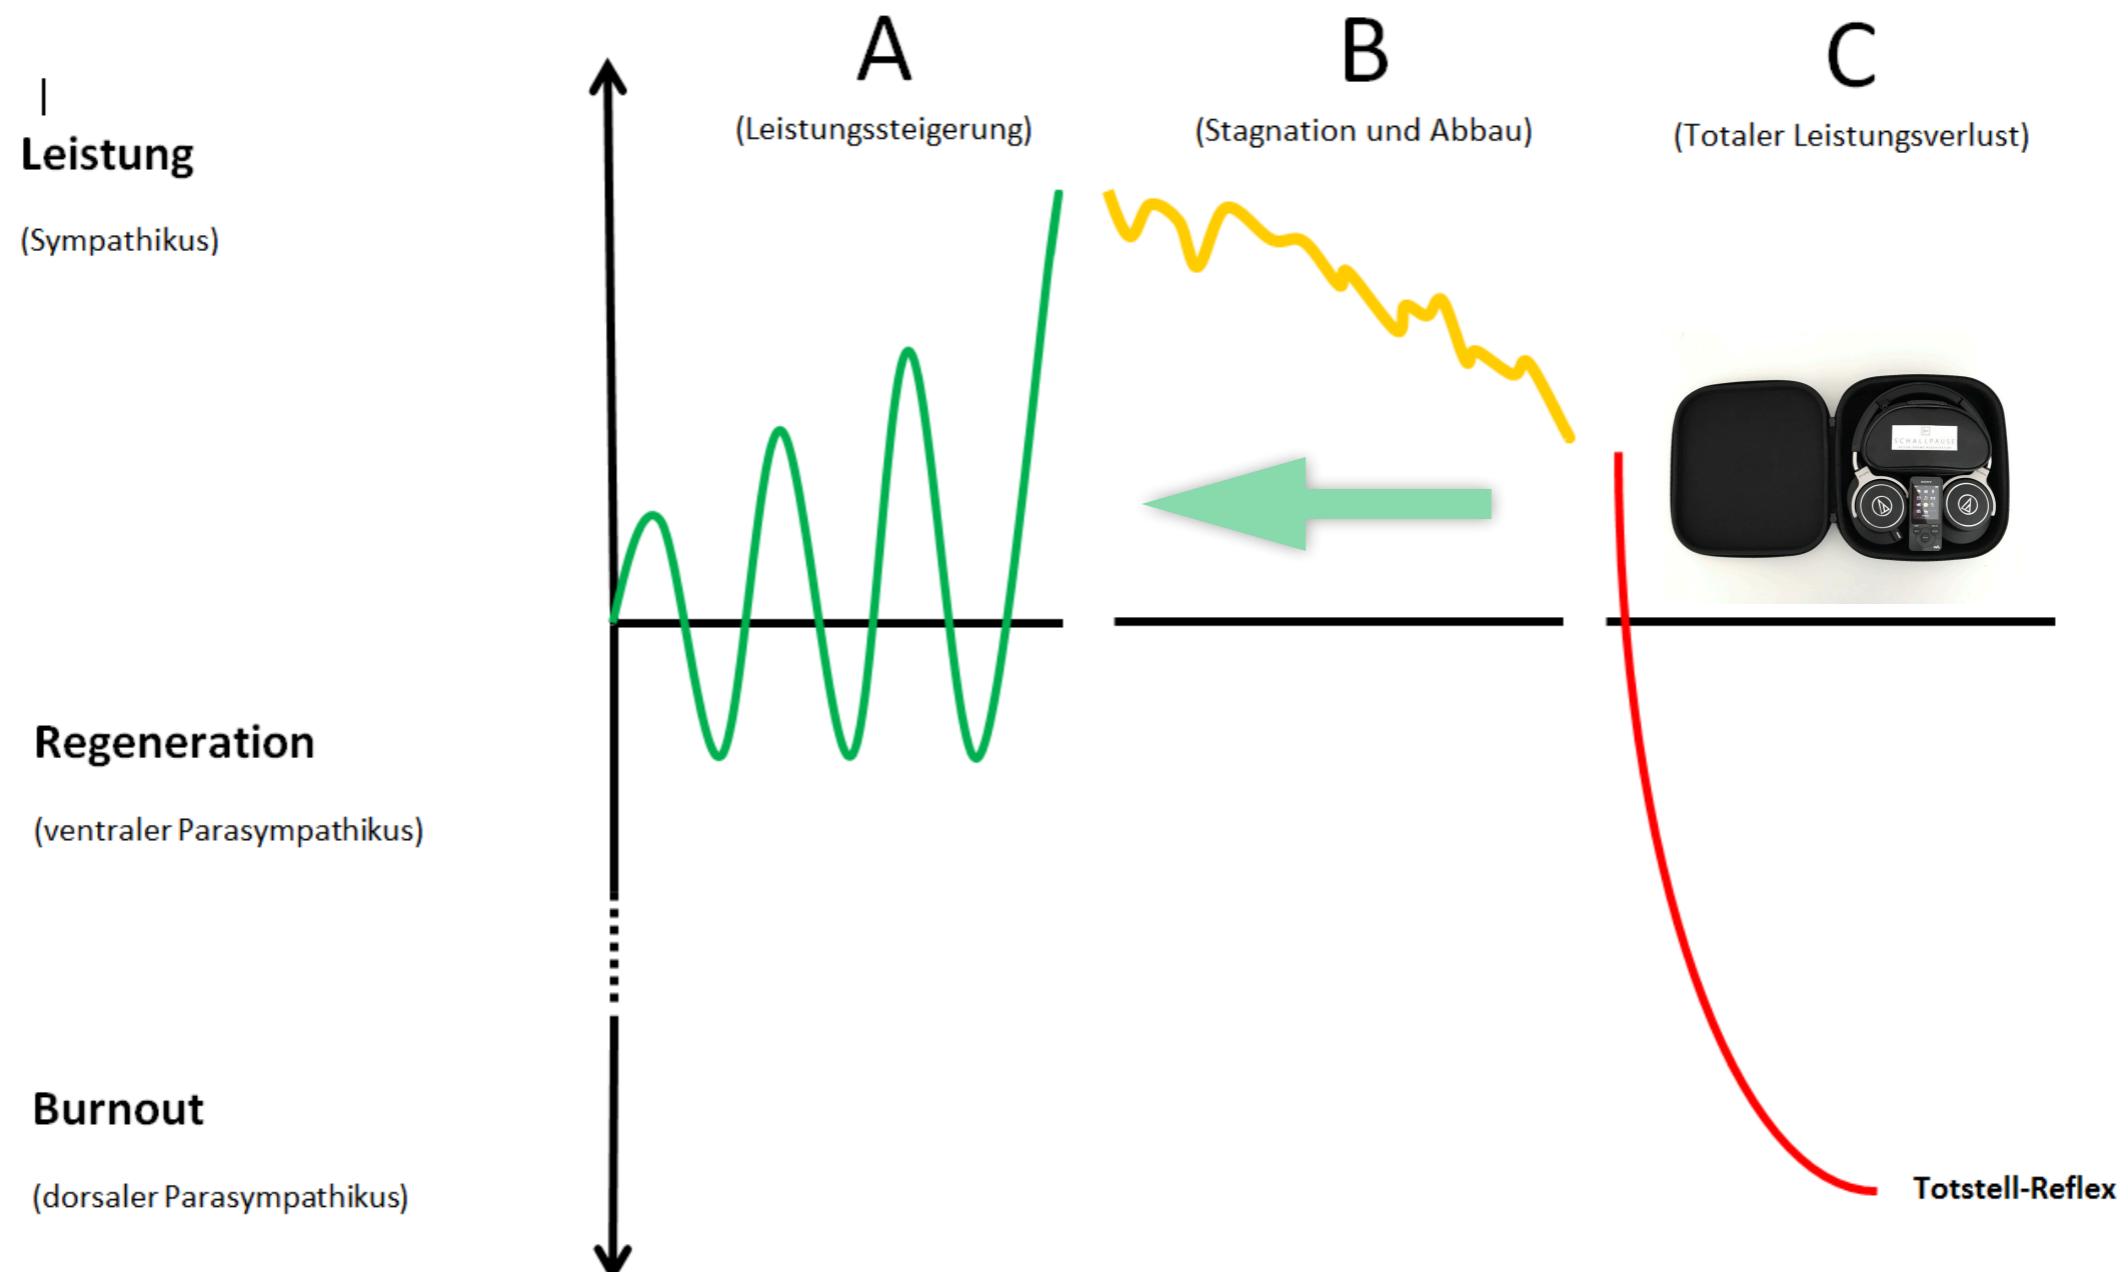

Measurement of Heart Rate Variability (HRV)

Measurement of Heart Rate Variability (HRV)

Der Weg zurück zur Leistung

Measurement heart rate variability

Wäre nicht nötig nach den Kraftübungen zu messen!

ok. habe auch nach Aufstehen gemessen

ohne Training

Passt!

Heute sehr gut!!
