The main team's tactical movements /sets/

- **Almost all teams used the following actions:**
- -PM crosses LP
- -"YUG" cross
- -"empty" cross between LB/RB and PM and the ball comes from wing,
- and their combinations with wing transition
- -simple and double crosses
- -short transition of LB/RB to the same side
- -PM changes position with ball to LB/RB, the opposite side wing gets the ball and crosses LB/RB on the middle

Numerical superiority

- -"negative" piston movement, the LP is on the opposite side between 1-2 defenders
- --"negative" piston movement, LP makes block on the centre back
- -"BL1, BL2"
- -"YUG" cross
- -PM crosses LP /FRA/
- -short transition of RB/LB on the same side

Numerical inferiority

- The teams used the changing between goal keeper and player temporary
- **Playing 7:6**
- Using temporary also, but just some teams ,rather in the last phase of the games.
- **2 LP** between **1-2** and **2-3** on the opposite side.

- -3 wingers
- -1 line player
- 3 ROU and 2 MNE players
- 8 out of 11 best scorers are from a top team /1.-6.place/

DEFENCE

- The teams used generally **6:0** defence system, just CRO played **5:1** and **3:2:1** system against HUN.
- They used **5:1, 4:2, 5+1** systems temporary and principally in numerical superiority.
- Some teams changed their system even during an attack according the opponent's tactic.
- The conceded goals increased from AV **25**/WECH 2016/ to **27**.
- The defender's behavior was determined of the referee's rules interpretation /focused by wing defenders/
