## EHF AND QUESD NV FORM STRONG ALLIANCE ON VIDEOS

**13 January 2010, Vienna** – QuESD NV of Belgium and the EHF are announcing their new partnership. QuESD NV has developed and sells video analysis systems named "SportVAS", enabling their users to make video analysis of sport matches and in particular to scout teams and players during professional sport competitions.

SportVAS has been adapted from renowned systems like SoccerLAB to handball and beach handball with the support of the EHF Competence Academy & Network (EHF CAN).

"SportVAS" enables the users to make video analysis of sport matches and in particular to scout teams during competitions.

» Press Statements Channel

Jim Kunnen, CEO of QuESD NV: *"This partnership is of great importance for us. After many successful years in the fields of other sports, especially soccer, we are now happy to be able to serve handball, which is not only a fantastic and emerging sport but also the second largest team sport of the continent."*

Helmut Hörtsch, EHF CAN: *"We are pleased to have a partner in video analysis with a top product, which will help us at major events like the 9th Men's European Handball Championship, to produce game and referee analysis for internal courses. This will enable us to build a lectoral video database including footage of not only indoor handball but also of the quickly aspiring beach handball. The Men's 2010 EHF EURO will be the scene for a pilot project with detailed referee analysis. The product will be promoted at our coach symposium for team managers from Europe."*

# 1. What is your vision?

# Develop a plan

**1. Vision**  
**2. Plan**

**3. Realize our goals**

**Michel Kranzen**  
**Head coach Belgium - 20**

# BELGIAN NATIONAL HANDBALL TEAM -20

## Our Vision:

At least once qualified for the European or World Championship -18 until -21

# VALUE CHAIN BELGIAN HANDBALL -20

Official EHF  
Kramic ©  
partner

# 8. Support the game

## Statistics

Decide on facts, not on  
believes  
=  
difficult to accept by players  
but no reason not to do it.

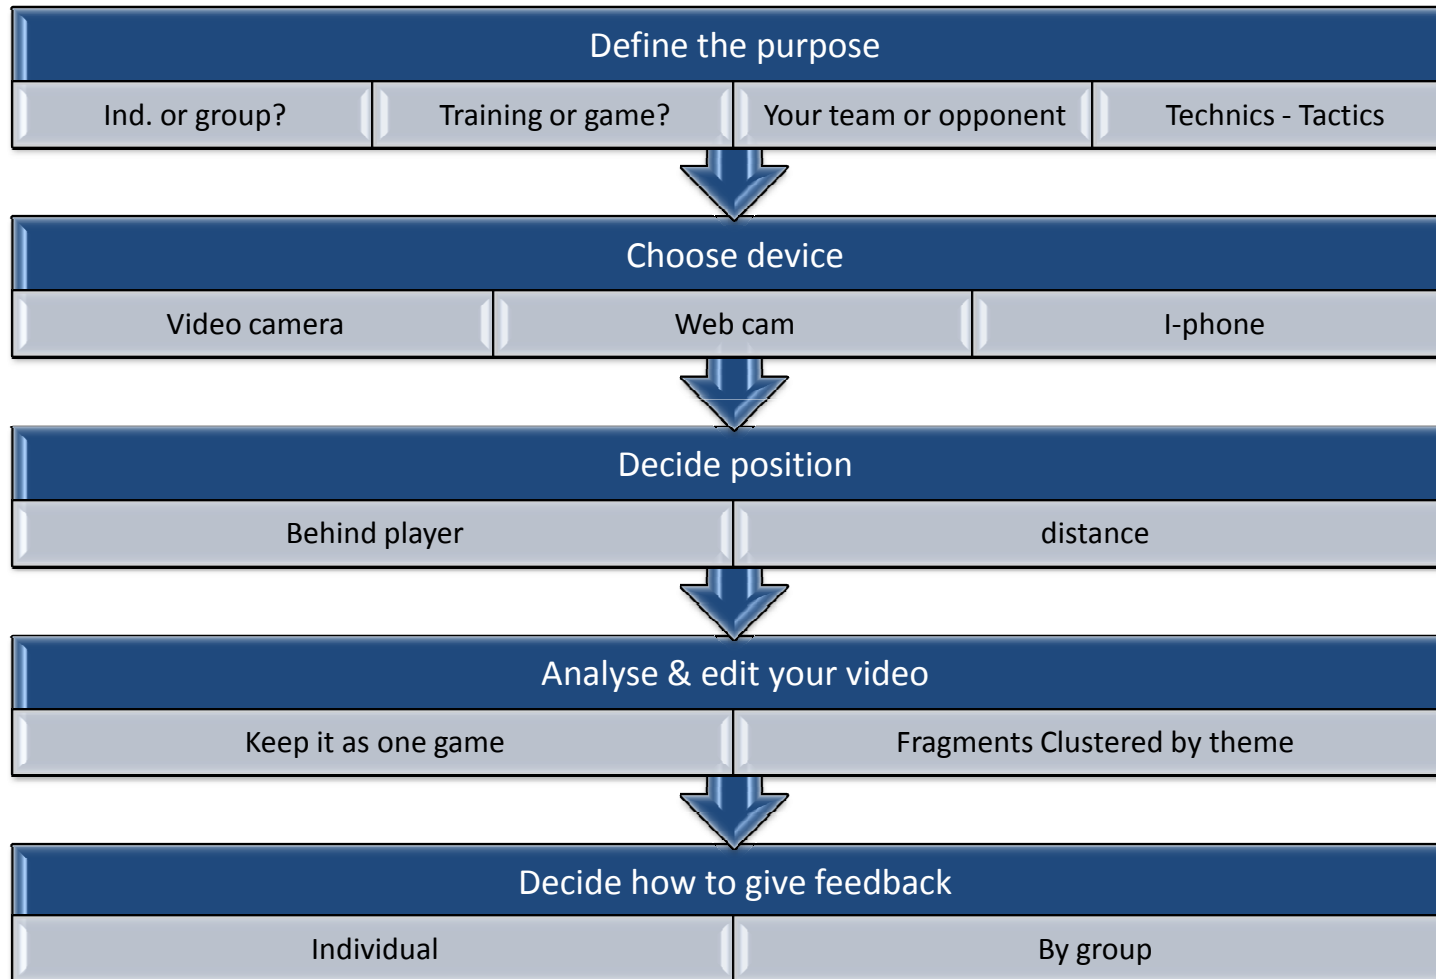

## Video

Seeing is believing  
=  
Video feedback is now more  
accepted as the youth of  
today is raised by visual  
triggers

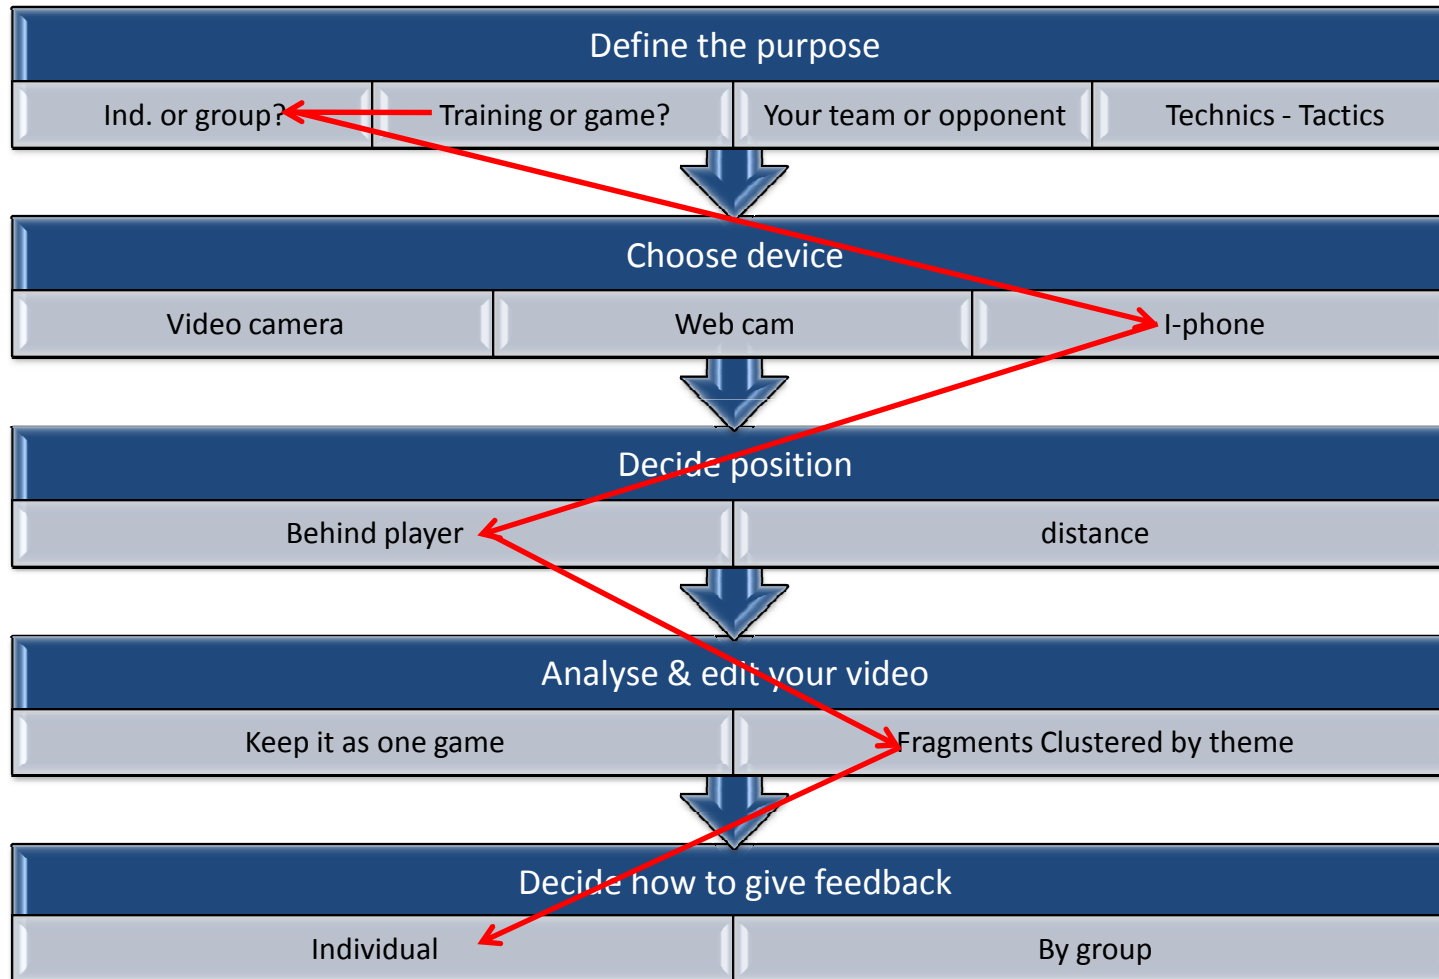

# 8. Support the Game: Video

# Belgium in Partille

- 16 players
- T1
- T2
- 1 technical director
- 1 fysio
- 23 teams & potential opponents, 8 games – 6 days
- How are we going to do our Video? More over, once we have it, how are we going to analyse it?

For us, this was a challenge

# Belgium in Partille

## Analysis? 12sec – 5 sec

1. Video of our opponent
  - Show opportunities
  - Show threats (ind. & systems)
  - Shots per position
2. Video of our own game
  - Show the good stuff where we can make the difference !
  - Show things to avoid

## Methodology:

1. Show opponent:
  - give no feedback but ask what they have seen
2. Show our game:
  - Ask what we need to do
3. Youth ...
  - is used to a fast forward stimuli => Max 10 min of video divided in parts.
  - Is triggered by visual input, there education is based on participation, not on drilling
